Availability settings

A) Availability
- **Show on course page** - make the activity/resource accessible/viewable by students
- **Hide from students** - prevent the activity/resource from accessing/viewing by students
- **Make available but not shown on course page** – make the activity/resource accessible/ viewable by students only through a link from elsewhere (e.g. from Page resource)

B) Group mode (i.e. Group availability)
- **No groups** - all students will have the same right to access/view the activity/resource
- **Separate groups** - students can access/view the activity/resource only within their groups
- **Visible groups** - students can access/view the activity/resource of their groups, and they can also access/view the activity/resource of other groups
