

## Database

Programme administrators / Instructors might use Database activity to allow you to create, show and search a collection of entries/records about a topic. Then you and other course participants can comment these entries.

### **Create an entry in Database activity**

- 1) In course main page, press the name of the Database activity
- 2) In Database page, press **[Add entry]** tab
- 3) Select the option(s), enter the information and/or upload file(s) to be added in your entry
- 4) Press **[Save and view]** at the bottom

#### **Note:**

Whether you can comment other students' entries depends on the Database activity's setting modified by programme administrators / instructors.
