

Wiki

Programme administrators / Instructors might use Wiki activity to allow you to create a collection of webpages, which can be directly edited by also other course participants or only yourself under different wiki modes.

Create a webpage in Wiki activity

- 1) In course main page, press the name of the Wiki activity
- 2) If necessary, select the appropriate option of “**Format**” (HTML, Creole or NWiki), then press **[Create page]**
- 3) Enter text and/or add image(s)/multimedia in the text editor as the content of this webpage, then press **[Save]**

Note:

- 1) **Only one** course participant can edit a webpage in Wiki activity *each time*, as the webpage is synchronized among course participants within the course.
- 2) In step 3, to create link to a new webpage for later editing, enter the webpage’s name within double square brackets (i.e. **[[webpage’s name]]**). Then in Wiki page, you can press **[View]** tab and press the new webpage’s name to edit and later view the content of this webpage.
- 3) In Wiki page, you can press **[Edit]** tab to edit the content of a specific webpage.
